The FAMILY FOOTPRINTS Project outlines an Innovative Approach to Digital and Climate Literacy for Families

Project Number: 2021-1-IE01-KA220-ADU-000035273

Press Release 4

The Family Footprints project, a collaborative Erasmus+ funded project aimed at supporting families through the dual transition, celebrated its successful conclusion with a final partner meeting hosted by The Rural Hub in Virginia, Ireland, on December 7, 2023.

The meeting marked a significant milestone as partner organisations from Sweden, Portugal, Croatia, Germany, and the Czech Republic gathered in person, while the Polish partner organisation joined the meeting online. It was a nice opportunity for partners to gather together one last time, following two years of dedicated teamwork and shared commitment to fostering digital and climate literacies of families across Europe.

Key Highlights of the Final Partner Meeting

At this meeting, partner organisations from diverse geographical and cultural backgrounds came together to share experiences, insights, and successful strategies for promoting the sustainable use of our project materials into the future. The meeting showcased the power of cross-border collaboration in addressing common challenges like the need for increased digital and climate literacy in European families. Through this meeting, we were able to review our progress towards tackling this issue and share success stories from our piloting activities with families in our local communities.

During this meeting, all partners were also able to engage in a comprehensive review of the Family Footprints project, highlighting its achievements, milestones, and the positive impact on the participating organisations, as well as local educators, families, and communities. At this meeting, partners were able to share key outcomes and success stories, emphasising our collective effort to create lasting change.

Our final meeting concluded with a discussion on potential future collaborations and initiatives. Partners expressed their commitment to continuing the momentum generated by the Family Footprints project and exploring new avenues for joint efforts in the realm of sustainable development and digital inclusion for all European citizens.
